

## For flat-head printers

AW7F is a soft wax quality product designed to meet the requirements of companies involved in Sustainable Development. Produced with the revolutionary SolFree® process, it is the only ribbon in the world coated without using solvents.

This general purpose wax quality offers very good printing quality, even on rough materials with high flexibility in printer settings.

In combination with the new generation of Toshiba flat-head printers it provides good, clear printed images of text and barcodes onto a wide range of labels stocks, from uncoated to high gloss papers and synthetics, with a blackness above 2.0 ODR and heat resistance up to 60°C (140°F). AW7F as all Toshiba ribbon products, offers the best in printhead protection with its superior backcoating.

## Always Choose Toshiba Ribbons for Toshiba Printers

The wide range of Toshiba ribbons available today ensures that our valued customers have different product options for virtually every thermal transfer application. Using Toshiba ribbons ensures optimum print quality causing minimum wear on working parts - in particular to the printhead.

Before a ribbon is certified by Toshiba it must first undergo stringent tests to ensure its continuity and reliability in the field. It is assessed on a variety of receiving materials, and at every speed and temperature combination. Only once this procedure is complete and deemed successful will the ribbon receive its certificate of approval.
